As are reminder, there is a State of CT law in place requiring that any homeowner who brings mechanical machinery onto their property must contact the (free service) **Call Before You Dig (CBYD) 811 or (800) 922-4455** phone numbers. With the significant amount of construction activity in our community, please remember that it is a homeowner's responsibility to call this number. With all of the water, electrical, sewer, and possible unidentifiable lines running underground, it is imperative to ensure all safety precautions are in place before digging.
